PROFESSIONAL SUMMARY

Motivated Full-Stack JavaScript Developer with strong foundations in modern web technologies, seeking an entry-level opportunity to contribute to real-world product development while continuously learning and improving technical expertise.

TECHNICAL SKILLS

- Frontend: React, HTML, CSS, JavaScript, Bootstrap, Tailwind CSS
 - Backend: Node.js, Express.js
 - Database: MongoDB, Sql
 - Tools: Git, GitHub, Terminal(CLI), VS Code
 - Deployment & Tools: Netlify, Render, MongoDB Atlas
-

PROJECTS

Wonder – Property Listing Platform

Built a full-stack listing platform with secure authentication and real-time database operations, demonstrating REST API design and deployment skills.

Tech Stack: Node.js, Express.js, MongoDB, EJS, Bootstrap

- Implemented user authentication and authorization using sessions/JWT
- Built CRUD functionality for property listings
- Integrated image upload for listing photos
- Designed RESTful APIs and connected MongoDB database
- Deployed the application for public access

Weather Forecast

A real-time weather application that integrates external APIs to fetch and display live weather data with dynamic UI updates.

Tech Stack: React, JavaScript, OpenWeather API, Material UI

- Integrated third-party API for live weather data
- Implemented conditional rendering for dynamic UI states
- Handled invalid city searches with custom error feedback
- Designed a modern glassmorphism-based interface
- Deployed the application using Netlify
